

# Business Continuity

## The Challenge

Maintain business continuity 24/7, seamlessly and cost-effectively

Revenue, productivity and performance take a hit when the network is not in place. Many agencies and enterprises simply can't afford to have any down time—continuity of the network infrastructure is crucial. Because traditional terrestrial back up systems are often susceptible to the same events that could affect primarily lines, mission critical systems need an alternative that can:

- Handle typical landline volumes in the case of an emergency
- Be available anywhere and be cost competitive to alternatives
- Work seamlessly with the rest of the landline network
- Handle existing and new corporate applications

## The iDirect Solution

Satellite-powered broadband IP service anywhere in the world

Landlines are vulnerable when there's an emergency. That's why iDirect provides high-speed business continuity over satellite—for seamless connectivity that's always available anywhere in the world. It's reliable, totally independent, cost-effective and secure. Our VSAT satellite solution provides:

- Satellite network redundancy
- High bandwidth on demand – up to 18 Mbps
- Network interoperability between landline and satellite back up
- The same guaranteed level of service that's available with terrestrial networks
- Seamless integration with existing systems and scalability

## How it Works

All the power of broadband IP—delivering the capabilities users need

The iDirect Satellite Router integrates all the hardware and software needed to deliver bi-directional broadband easily and efficiently. And the iDirect solution provides the networking power you need to support all your user applications, and meet any communication challenges via satellite. An iDirect powered satellite back up system offers:

- Easy deployment
- Bandwidth on demand
- Scalability up to 18 Mbps
- Support for RTTM applications like VoIP and video
- Built-in 3DES encryption including TCP/HTTP acceleration
- "Real" private networks

Developed specifically to meet the communication needs of enterprise customers, iDirect-powered networks break the constraints of traditional landlines. We deliver the speed, performance and flexibility to fulfill the most demanding requirements of today's end users — anywhere.

*Take advantage of iDirect's unique combination of highly-efficient bandwidth usage, enormous flexibility, and superior reliability and performance. Extend your broadband service anywhere in the world, economically, quickly and easily, with iDirect.*
