

Video Collaboration

The Challenge

Enterprises need to provide videoconferencing, training and education for remote locations

Organizations increasingly recognize the benefits of videoconferences—transmitting and receiving video images, and providing training and distance learning between locations around the world. Many organizations are limited in their ability to benefit from these services by the availability of broadband access in remote areas. Any videoconferencing and streaming media in these locations must fully integrate with existing applications and infrastructure, and end user access must be simple, straightforward, secure and cost effective.

The iDirect Solution

Practical, on-demand video collaboration anywhere in the world

iDirect's networking solution offers full video collaboration capabilities, anywhere in the world, including the most remote locations and harshest environments. Our advanced satellite networking solution provides more than just high-speed broadband IP satellite access. iDirect provides:

- High bandwidth, up to 18 Mbps
- Reliability, and security
- Easy interoperability with terrestrial networks
- Efficient bandwidth allocation
- Support for real time applications like VoIP and video
- On-demand video streaming from any location

How it Works

High-speed broadband IP service over satellite delivers maximum bandwidth that's fast, flexible and allows video support anywhere

iDirect-powered networks:

- Support star, mesh or hybrid configurations to insure communications capabilities between all facilities
- Provide the most powerful QoS in the industry ensuring toll quality VoIP and video
- Deliver rapid bandwidth on demand
- Support greater network efficiency

Developed specifically to meet the communication needs of enterprise customers, iDirect-powered networks break the constraints of traditional landlines. We deliver the speed, performance and flexibility to fulfill the most demanding requirements of today's end users — anywhere.

Take advantage of iDirect's unique combination of highly-efficient bandwidth usage, enormous flexibility, and superior reliability and performance. Extend your broadband service anywhere in the world, economically, quickly and easily, with iDirect.
